DAUGHTERS OF AMERICAN REVOLUTION HOLD FIRST BANQUET

Delightful Occasion at the Elks' Club on Saturday Afternoon Last

A FINE PROGRAM WAS GIVEN

The first annual luncheon of the Monongahela Valley Chapter of the Daughters of the American Revolution was held at the Elks' Club on Saturday, January 8. There were fifty-seven ladies present, representing towns along the valley from Brownsville to Monongahela.

One year ago a party of "Daughters" met at California to discuss the organization of such a Chapter in the valley. Today the membership is seventy-five with a number of names yet to be passed upon by the National Board, which meets in February. The tables were decorated with narcissus and blue and white ribbon, the colors of the officers of the National Society.

Mrs. Goslyne, of Belle Vernon, ably acted as toastmaster and her apt and witty remarks caused much merriment. The first toast was proposed to Miss Etta Lilley, of California, the organizing and present Regent of the Chapter, who responded in a most interesting manner. She told of the early history of her family which crossed the mountains on pack horses and lived in a log house once used as a fort; also of one of her ancestors, a physician whose practice extended from Uniontown to Wheeling. The saddle-bag in which he carried his medicine is still treasured by the family. She spoke of the beginning of the Chapter, and its aims and ambitions, stating that "we are still fighting the battles for liberty begun by our ancestors and said that those principles for which they lived and died should be doubly precious to us as a Chapter, because we had been organized just after the Great War, when we could more closely understand what the Revolutionary War had meant to them."

The second toast was by Mrs. Piper of Charleroi, who spoke of the history of the Monongahela valley and recounted many interesting and amusing events. She was followed by Mrs. Ely of Monessen, who paid tribute to the men and women of the valley who helped in the Great War.

The Chapter then enjayed a solo by Mrs. Whitsett of Monessen and a duet by Mrs. Davis and Miss Hazzard of Monongahela, accompanied by Miss Berry of Monessen.

Three visitors from neighboring Chapters spoke in response to invitation. Mrs. Stuart and Miss Lytle of Pittsburgh Chapter, and Miss Woodhall of Andrew Linn Chapter, all expressing approval and enjoyment of the occasion.

The last number, "Our Flag," by Miss Laird, of Charleroi, was all inspiring and most forcefully set forth those principles and aims of the Daughters of the American Revolution as well as true Americanism.

The ladies from other towns very generally expressed the feeling that Charleroi is to be congratulated in having the Elks' Club, where such meetings may be held.

NEW PASTOR HOLDS FIRST COMMUNION

The First Presbyterian church had a memorable service Sunday. It was the first Communion service conducted by the new pastor, Rev R. J. Shields. The attendance taxed the seating capacity of the auditorium and the service was most beautiful and impressive. Twelve adults were received into the membership of the church and one adult and six infants were baptized. The outlook for the church under the leadership of Rev. Shields is most encouraging.

MONESSEN POLICE ARE IN TROUBLE

There is trouble in the police department of Monessen, which may finally result in the overturning of the present system and the installation of new officers.

For some time there has been friction between the citizens of the borough and members of the force over the manner in which the department has been conducted. The police officers have been backed by the police committee of council, and as a result complaints made by citizens against police officers have been ignored. The situation finally became so tense that on Saturday last Burgess Stewart suspended Chief John W. Coover, Lieutenant Larson and two patrolmen. On Monday council held a special meeting at which the suspended officers were restored and are again on duty.

Some time ago the Monessen Board of Trade appointed a special committee of ten members to investigate conditions, and it is said they have uncovered a state of things, backed by a mass of testimony, which makes it look rather bad for the police. These officers are charged with protecting bootleggers, extortion and the larceny of money from prisoners. It is alleged that the officers have looked with leniency on the activity of bootleggers in that town, and as a consequence it is said that both beer and whiskey are peddled openly and that a big business is carried on both day and night.

On Monday an agent of the Department of Justice as well as Prohibition Officer Silvus, from Pittsburgh, were in Monessen, getting some data on the situation, and it is intimated that an investigation will be made which will involve not only a number of "higher-ups" in Monessen, but in some of the surrounding towns as well.

New Bakery Is Completed And Is Now In Operation

The new Stevenson bakery, located at the corner of Second street and Washington avenue was operated for the first time beginning Sunday night. The plant is not yet complete, as an additional oven will be erected, but work on this addition is already under way, although it may be some time before it it completed. Some minor adjustments are also being made in the machinery, which was moved from the old plant on Fallowfield avenue, and when these are completed Mr. Stevenson expects to have one of the most modern bakeries in the way of equipment in the valley.

When all the improvements are installed and completed the bakery will have a capacity of 20,000 loaves per day, with forces working two turns. However, it is Mr. Stevenson's intention to work only the daylight turn at least for the present, increasing production as necessity demands.

The new plant is complete in every way, with capacity for storing several cars of flour in the basement, and with arrangements for taking care of the trucks employed by the company. The building is so arranged that production can be maintained with a minimum of expense, and with a continuation process that will permit the bakery to get its product into trucks and away to customers at an early hour every morning.

Mr. Stevenson is now tearing down the old oven in his Fallowfield avenue building, and will use the greater part of his material in the erection of the additional oven at the new plant. The space thus vacated will allow Mr. Stevenson to increase the size of his storeroom on Fallowfield, with an additional room in the rear for kitchen purposes if he so desires. It is his intention in the future to do all his pastry baking at the old plant and bread baking at the new plant.

The completion of this bakery gives Charleroi another wholesale house which will serve a large part of the territory up and down the valley, as well as outlying towns in the eastern end of the county.

HIGH HONORS FOR PROF. C. C. LIVELY

A distinguished and well deserved honor has been accorded Prof. C. C. Lively, principal of the Charleroi high school, in his admission to the American Association for the Advancement of Science. Entrance to this society, of which Dr. L. O. Howard, head of the Bureau of Economic Entymology, one of the divisions of the Department of Agriculture, at Washington, is president, is made by nomination, and afterwards acted upon by the Council. Prof. Lively was nominated by Dr. Burton E. Livingston, professor of Plant Physiology at Johns Hopkins University, and on Thursday last, notification came to him that he had been elected, and assigned to the section of Psychology and also the section of Education. The American Association or the Advancement of Science is an affiliation of national scientific societies in the United States, which have done successful work of some form, for research work, and meets every year. The last meeting was held during the holidays in Chicago, and next year's deliberations will occur at Toronto, Canada. The numerous friends of Prof. Lively will rejoice at this well deserved recognition of his unquestionable capabilities.

Marian Foley.

Marian, infant daughter of Mr. and Mrs. Albert E. Foley, died at her parents' home, 209 Meadow avenue, Monday, January 10. Funeral service on Wednesday afternoon at 2 o'clock, interment in Monongahela cemetery.

DEATH OF FORMER RESIDENT IN IOWA

A copy of the Sloan, Iowa, Star, dated December 31, 1920, received in Charleroi a few days ago by Charleroi relatives, contains an account of the death of Miss Anna Margaret Frye, only daughter of Mr. and Mrs. Smith C. Frye, of that place, which occurred on Tuesday night, December 28, after an illness of only a few days.

The deceased was born in this county, August 13, 1863, and in the autumn of 1876, in company with her parents moved west and located at Minonk, Woodford county, Illinois. In December, 1899, the family moved to Sloan, Iowa, where they have continuously resided since that time.

Miss Frye was a member of the Congregational church, being active in the Ladies Aid and Missionary societies. She was also a member of Orient Rebekah Lodge of Sloan, and during the war was active in Red Cross work. She was related to many families in Charleroi and Fallowfield townships. Mr. and Mrs. Isaac Morris, of Fallowfield township, attended the funeral services, Mrs. Morris being a cousin of the deceased.

EVANGELISTIC SERVICES.

BOARD OF TRADE DIRECTORS HAVE TENDERED RESIGNATIONS

NO CHANGE IN FORCE OF "MOVIE" INSPECTORS.

A telegram from Harrisburg says that Governor Sproul on Wednesday informed a committee from the Church Federation and other organizations of Philadelphia, that he intended to maintain present standards in the inspection of moving pictures and urged citizens of the state to report any film not carrying the state inspection seal. He also declared the present inspecting force was satisfactory and that he did not intend to disturb it.

STATE LAWS MUST BE COMPLIED WITH

Coroner Willian. Greenlee in a statement made public on Thursday warned the citizens of Washington county that the law must be strictly complied with in regard to violent deaths requiring an investigation to determine whether criminal negligence or intent ma yhave been the cause.

"This warning is issued," said the Coroner, "because of several instances recently in which bodies have been removed from the scenes of fatal accidents and the proper authorities not notified immediately.

"In cases of sudden or violent deaths, the law requires that the bodies be not disturbed or moved until the coroner, his deputies, or the district attorney's office hsa been notified, so that proper and legal steps can be taken to conduct an investigation immediately. The coroner or his authorized representative must give permission for the removal of a body."

The coroner calls attention to the fact that in some cases bodies have been moved, causing delay in gathering facts and starting a search for crimes. He says the law requires that bodies in coronial cases must not be disturbed until after viewed by the coroner or his deputies. In some cases it is necessary to hold an autopsy. After the proper steps have been taken the body will be turned over to the family to make arrangements for burial.

DUQUESNE HIGH PLAYS CHARLEROI THIS EVENING

The Charleroi high basketball team will meet the Duquesne high on the local floor this evening, game being called at 7:45 sharp. Duquesne has a strong team, and the game should be very interesting.

Step Taken to Bring About Fullest Success of New Movement

TO START WITH A NEW SLATE

One of the important contributions to the success of the movement for the expansion of the Charleroi Chamber of Commerce was made today, in the opinions of the members of the executive committee, when it was announced that the officers and directors of the existing Board of Trade had tendered their resignations.

Formal announcement of this action will be made at the great civic dinner in the Elks' Club on Thursday evening. It was thought best however, to make the fact public in advance of that gathering, together with the reasons which have suggested such action.

The officers and directors point out in the announcement of their resignations that their only thought is the fullest success for the movement. They are not unmindful, they say, of the honor which their selections as directors and officers implied, but they do feel that in asking the citizens generally to become members of the new Chamber of Commerce, they should make it possible for the greatly enlarged membership to select the governing group unhampered by any other consideration then merit.

The new organization, it is pointed out, is to be of the most democratic type. Each member is going to have as much as any other to say about its policies, acts and officials. The election of the new directors and officers will take place at once after the completion of the membership drive. The formal announcement of the directors follows, in part:

"An effort has been commenced for the building of a Chamber of Commerce that may be truly representative of the civic and commercial interests of Charleroi, to secure financial strength to the point where it may be able to accomplish big things seriously needed, and to bring it into conformity with practices which have been found most effective in progressive communities throughout the country.

"In order that the expansion and awakening of civic spirit may be fully accomplished, and as evidence of our desire to aid in every possible manner in the creation of a Chamber of Commerce along lines which have been found by experience in other cities to work with the utmost satisfaction, we, members of the Board of directors of the Charleroi Board of Trade, hereby tender our resignations, to become effective when the new organization shall have been completed and the new board of directors and officers shall have been elected and a majority thereof shall have qualified for such positions.

"In taking this action, the board aims to clear the way for each new member of the Chamber of Commerce to voice his wishes in the selection

THE LAZY BUG.

In former times the inertia of the people of the tropics was naturally attributed to the climate, for it is too much to expect them to rush around and do in a hurry anything that can be left undone when the torrid sun glares and the thermometer keep in the high altitudes the year round. But this old and sufficiently reasonable theory has been exploded by the Rockefeller Foundation, which has shown that the real reason of tropical indolence is not the climate but a body parasite called the hookworm, a creature which preys upon practically everybody in hot climates, producing not only the ordinary igns of laziness, but stunted mentality, blighted health, inefficiency, degeneracy and decay.

It seems that the voracious and blighting hookworm girdles the whole earth in the neighborhood of the equator and that the Rockfeller Foundation has found its terrible ravages in all of the fifteen tropical countries it has investigated. We read, for example, that 98 per cent of the coolies in India are affected, while in a district of Brazil including Rio de Janeiro 86 per cent of the adults and 90 per cent of the children are victims. Yet Rio is a great, beautiful and in ways a very progressive city and much more has been achieved in tropical countries generally than could reasonably be expected. No doubt there is a hookworm, but some other theory of tropical languor may hold the stage fifty years hence.

Princeton University, though supposed to be a Presbyterian institution and until recently partly supported by the Presbyterian church, has 178 Episcopalians in its freshman class to only 138 Presbyterians, which are in a majority also in the sophmore class. Its general character has not changed however, for only one atheist was found in the whole college.

The iron workers of Newburn, N. C., demanded profit sharing in lieu of salaries and their first pay envelope under the new system contained ten per cent less than they usually received. In that instance joining the pofiteers did not come up to expectations.

The announcement that the Panama Canal is to be made proof against attack from the air as well as from land and sea does not mean that it is to have a bomb-proof cover throughout its length, whatever else it may mean.

BELLE VERNON HOME ROBBED THURSDAY NIGHT

The home of T. L. Davis, a farmer residing between Fayette City and Belle Vernon, was robbed during the early hours last Thursday evening, a sum of $35 in currency and $200 worth of Liberty Bonds being taken. Police were not notified of the robbery until some time after it had been discovered. No arrests have been made, but it is said that several young men are under suspicion.

Remember your dead. W. S. Cook and Co. Monuments with Lawrence Frye Funeral Director 208-f

SMITH'S PEOPLE WILL DEFEND HIM IN COURT

Albert Smith, it is stated, will, through the assistance of his father, Ruben Smith, of Fairhope, defend himself against the charge of arson in the Fayette county court, and has employed legal talent, according to reports, to handle the case. Smith, it is said, will change his plea of guilty to that of not guilty, notwithstanding the fact that he is alleged to have made a full confession before state and county officials.

MORE COAL PURCHASED IN GREENE COUNTY

H. D. Patterson of Waynesburg last week closed the sale of 2,000 acres of coal lands in Whitley township, Greene county at a consideration of $600,000. The coal was purchased for the Whitley Coal company, a corporation having its headquarter in Pittsburgh. The coal has all been purchased from the farmers, and when the purchases have been completed will leave very little in the hands of the farmers of Whitley township.

Experiments of the Department of Agriculture have shown that chestnut groves may be restored by the crossing of the chinquapin, a dwarf chestnut, with a Japanese chestnut that is a blight resistant.

Miss Frances Humphries has returned home after spending the week end with her cousin, Miss Cubt Crouch of McKeesport.

DYES TO BE SUPERFLUOUS?

Short Cut to Gorgeous Colorings Being Worked Out by a Wizard, It Is Said.

A. W. Brabham of Clair, S. C., soon to be known as the Wizard of the Cotton Patch, Burbank's only rival, announces that the American dye industry is unnecessary, or at least soon will be, according to Drug and Chemical Markets. For has he not grown cotton already dyed various shades of brown, green, blue, pink and gray as it comes on the plant? And does he not expect to produce black in a few years as well as all the colors of the rainbow? Thus will the need of colors for cotton be obviated and the wealth that now is being accumulated by the dye barons will be diverted in the cotton growing districts of the South.

No mention is made of dyes for wool, but even these will be unnecessary when some genius undertakes to spend half a lifetime crossbreeding sheep to color their fleece, and this genius would have less difficulty than with cotton, as he would have ready at hand the world over supply of "black sheep." Then it would only be necessary to teach the silk worms to turn out colored silk after feeding on the flower bed and the flax plant to produce green fibers from green sand, blue from blue marl, red from red clay, and black from loam, ad infinitum.

Wonderful prospects, IF—

Always a Sunny Side.

The toughest thing in all this world has its sunny side. There is joy in a stubbed toe when it stops aching. It feels so good!

Slang and Idioms.

That the slang and idioms of today will be correct English tomorrow is the opinion of Professor Glicksman, University of Wisconsin. "Our language is made up of what was once slang, idioms, colloquialism and jargon," he said recently.

Didn't Use His Weapons.

A dog stolen in New York had three gold teeth and wore a collar studded with a bunch of brilliant stones. If he had been a real dog, he would have sunk those three gold teeth into the thief.—Minneapolis Journal.

Daily Thought.

We learn wisdom from failure much more than from success. We often discover what will do by finding out what will not do; and probably he who never made a mistake made a discovery.—Samuel Smiles.

IRRIGATE THE SAHARA DESERT

American Windmills Are Now at Work Pumping Water for Artificial Algerian Oases.

It is refreshing in an almost literal sense, this report that a traveler brings back from the Algerian Sahara about the sinking of wells and the consequent irrigation and the improvement of highways.

It is delightful to imagine a fringe of green in that country, arid since the beginning of time, the blossoming of orchards and gardens, the waving of fields of grain, and the motor-car relieving the patient camel of its burden and making across the wastes in short with the time the camel would take to do it. Between Tunis and Carthage this observer counted hundreds of American windmills, and the Grand Moor is ceasing to be so much of a nomad, but is rejoicing in an urgent bid for American motorcars.

How far it is possible for windmills and motorcars to work south from the border states of northern Africa and invade that hitherto hopeless sandy waste perhaps nobody knows, but it is encouraging that the invasion is proceeding just as it is constantly narrowing the limits of the arid regions on our own continent. Good, hard highways are linking the artificial oases together and the motorcar furnishes a quick way of communication between them as well as a means infinitely superior to the old camel caravan of getting fruits and grains to market.—Omaha World-Herald.

Island Women Are Financiers.

The Loo Choo Islands, home of the world famous red lacquer ware, lie between Japan and Formosa, not far from China's coastwise routes. The ware tables, bowls, trays and boxes used daily throughout Japan and China, and sold to thousands of tourists, come principally from the little towns of Naha and Shuri. The trade in the ware is conducted by the women, who do all the merchandizing, and in fact have charge of it. They are strictly one-price merchants, the amount first asked for an article being the one at which it is finally sold, no matter how much bargaining is done. The women are straight of back and erect of carriage, due to the custom of carrying everything on their heads. No matter what the weight or size of the object they place it on their head, and walk off seemingly giving no thought to balancing it.

Town Crier in France.

In the old days the town crier was a recognized institution throughout France. But when the art of printing came in the newspapers drove the town crier out of business. There are parts of France, however, where the town crier still makes his announcements, according to one of the members of A Company, Eighteenth engineers. In an obscure little village near the town where this unit was camped there is an old man who stands at the main street corner and beats a drum to attract the attention of the populace when there is news to be given out. There is no newspaper. When the armistice was signed the people of that village learned of it from the crier.—The Spiker, France.

THROAT SORE?

Then Watch Out for Diphtheria or Tonsilitis

The doctor often takes out unhealthy tonsils, because he knows they are liable to poison the system with deadly diseases. He will tell you that whenever bacteria inflame the membrane of the throat or tonsils, and make it feel sore, a danger signal is being flashed to your brain through the outraged nervous system.

You will find Krew-Pina excellent for quick relief in all cases of inflammation. For sore throat, apply to the throat and massage gently. Also, put a pinch in each nostril. Do this before retiring; then, draw the bed clothes up about the ears a little and inhale the medicinal vapors.

Krew-Pina is an ointment made up entirely of simple home remedies such as Oil of Pine and other volatile oils in a petroleum base—absolutely harmless and of wonderful alleviative and healing properties, owing to the scientific nicety with which the ingredients are proportioned. Specially adapted to household use in cases of colds, croup, bronchitis, neuralgia, whooping cough, sores, stiffness, cuts, bruises, sprains, etc. 30c and 60c jars with directions—at your druggist's.

Free Sample of Krew-Pina
WILL BE SENT TO ANY ADDRESS ON REQUEST.

We give you better work at less cost than can possibly be gotten elsewhere.

M. T. Crowley Marble & Granite Co.
325 McKean Ave. Charleroi, Pa.

BENJAMIN FRANKLIN, PRINTER

The observance of Franklin's birthday, January 17, is very typical of the man.

He crammed some useful work into every minute of his active life. His birthday is celebrated not with closed shops, but with all the activities of a busy day.

His life and teachings point the way to success through thrift of time and resources. All over the U. S. on Jan. 17, people now observe National Thrift Day.

The world gave him many titles, statesman, philosopher, scientist, inventor, teacher. He chose the most modest of all, printer.

Like Franklin, this Institution leads the way to success and prosperity through thrift of time and money.

SEEKS ACCOUNTING FOR MINING COAL

A suit to secure an accounting has been filed by William E. Smith of California, against A. V. Dixon, John Dixon and J. J. Collins of East Pike Run township. The suit involves a certain partnership. wherein the above named four persons were interested. Each put into it $250 which sum the plaintiff avers he paid. The firm purchased what is known as the Dixon heirs coal in East Pike Run township. This coal was mined and sold. It is of this business that the plaintiff seeks an accounting.

MAJESTICS TRIUMPH OVER THE TIGERS

The Majestics won their fourth consecutive victory Saturday when they defeated the Tigers of Lock Four by a score of 19 to 13. It looked for a time as if the Tigers would win, but in the last few minutes of play the Majestics by some neat playing caged enough baskets to win.

NEW TYPE STEEL BARGE IN SERVICE

The steamer Carbon. recently purchased by the LaBelle Steel company from the Pittsburgh Coal company, passed up through Lock No. 4 on Monday. having in tow four new steel barges of a consignment of forty being constructed by the American Bridge company, which were being taken to the LaBelle mine in the sixth pool for loading. These new barges are being constructed along different lines from others. that they may be used in both the Monongahela and Allegheny river trade. They are 140 feet long. 26 feet wide and nine feet deep Two new steel steamboats, of the same type as the "Homestead" of the Carnegie line. are being built for the LaBelle company.

OTHER COAL VEINS ARE TO BE ASSESSED

During the year considerable acreage of the Mapletown and the Waynesburg veins of coal in Greene county to have been severed from the surface and sold. Heretofore, the Mapletown vein had never been assessed. The commissioners have decided to fix an assessed value on all of the two veins that have been sold. at one third the consideration of the sale. In the Mapletown section several hundred acres of this coal have been sold. which will bring a considerable amount of tax into the county funds.

TRANSFERS INDICATE COMING ACTIVITY

Two deeds placed on record during the week indicate that industrial activity in the Mingo valley is about to take place on a large scale, and confirm the stories that have recently been made public about the importance of this locality.

Of date of December 6, 1920, the Star Fuel company transfers to the National Mining company, of Pittsburgh, the Pittsburgh vein of coal underlying five tracts of land in Carroll township, containing 359.8839 acres; also the Pittsbugh coal underlying 9.569 acres in Union township; also 1.78 aces of surface in Carroll township, together with all equipment and other property on the above land; consideration $100,000.

Of date of January 5, 1920, the Pittsburgh Coal company of Pittsburgh, transfers to the Mingo Valley Railroad company of Pittsburgh, 30.025 acres in Carroll and Union townships; consideration $135,726.70.

Active work on these developments is expected to begin just as soon as weather conditions are of a more favorable character.

HEALTH REPORT IS MADE TO THE STATE

Health Officer W. M Darby has made his annual report to the State Department of Health, which shows the number of communicable diseases which have been reported in the borough during the year 1920. From this report we learn there was one case of anterior pohomplets or as it is more generally known. infantile paralysis, one case of cerebrospinal meningitis, twenty-two cases of small pox, twenty-five cases of diphtheria, one case of erysipelas, 610 cases of measles. 61 cases of mumps, 33 case of scarlet fever and 19 cases of whooping cough.

Outside of the epidemic of measles the general health of the borough was up to the average of other years.

BOARD OF TRADE

Continued from page 1.

of those who are to direct the chamber. By resigning at this time the board makes it possible for anyone to enter as a charter member of the new civic-commercial body with full and immediate right to cast ballots and hold any office within the gift of the organization. This is the sole consideration entering into the board's decision."

METHODIST EAGLES DEFEAT THE PANTHERS

The Methodist Eagles defeated the Panthers in an intereting basket ball game Firday evening last, by a score of 12 to 8. Torbert was the star of the game. Score:

"COKE BREEZE" URGED AS A SMOKELESS FUEL

What is known as "coke breeze" as a substitute for coal in abating the smoke nuisance is advocated in the report of the Pittsburgh Chamber of Commerce committee on railroad electrification and smoke abatement, approved Tuesday evening at a meeting of the directors. The reporting committee has been making a study of smokeless fuel, co-operating with the State Bureau of Mines.

CONVERTED IN STRANGE WAY

Woman Led to See Beauties of Christianity Through Advice Given by Brahmin Theosophist.

How a woman was converted to Christianity by a Brahmin is told in the Boston Herald by Miss Lilian Freeman Clarke.

Celia Thaxter, the poetess, was an earnest student of strange and mystical teachings. At one time she was much dominated by the teachings of John Weiss, and she did not appreciate the beauty and power of the Bible. She met a good deal of a Hindu theosophist named Mohini, and under his guidance came to regard herself as a theosophist.

One day she said to her friend, Mary Parkman, "Did I speak contemptuously of such a person? I ought not to, for one of the principles of theosophy is to feel no contempt for any human being."

Miss Parkman replied: "But did not Jesus teach that? Is it not all in the Sermon on the Mount?"

By and by Mohini himself happened to get hold of a copy of the New Testament, and was much surprised and impressed by the beauty of its contents. He spoke of it to Mrs. Thaxter, and found to his amazement that she knew nothing about the New Testament.

"What!" he said. "You do not read your own religious books? I never heard anything more beautiful than this."

Mrs. Thaxter forthwith began to read the New Testament and became so much interested in it that she went about with a copy in her pocket; whenever she had a chance she would read it. From that time she began to attend Phillips Brooks' church. She was converted to Christianity by a Brahmin theosophist.

BIG DAY IN BALBOA'S LIFE

Great Spanish Explorer First Sighted the Pacific Ocean on September 25, 1513.

On Sept. 25, 1513, Vasco Nunez de Balboa had his first peep at the blue expanse of the Pacific ocean, remarks the Los Angeles Times. It was gained from the top of the mountain range at the isthmus of Darien. Four days later, on the 29th, he reached the shore himself and stood waist deep in the waters. He called it the Great South sea and he took formal possession in the name of the king of Spain, after the manner of the old-time explorers. That was the big day in Balboa's life. He came to the New World as a stowaway and he attained the title of admiral of the Pacific and governor of Panama. Yet four years later he was executed in the public square at Acla on a trumped-up charge of treason. Balboa was an adventurer with the passions of the buccaneer, the daring and the spendthrift. Yet as he gained power and authority he developed prudence, judgment and foresight. He was a regular sour apple, now California has a delightful beach and a guarded bay named after him. It would be very proper to call the last week in September Balboa week in this section, for from the discovery to the possession of the Pacific four days elapsed.

Peculiarities of Stature.

Stature depends a good deal on climate. The Bushmen live in the great Kalahari desert, the tall Polynesians on the Pacific islands, and enjoy all the advantages nature can bestow. The Hottentots, of the same race as the Bushmen, but inhabiting more fertile country, are appreciably taller.

On the higher ground the people are usually shorter, so that the Swiss and central Europeans generally are smaller rather than tall. Sometimes strange verses with the class of men. Paris antagonists in Argentina before they were matched by the steamship companies were always taller than the races from which they had sprung. They were picked men, full of physical vigor and courage. Stature varies also according to profession. About half the professional and ecclesiastical classes are tall men, but only about one in ten of the soldiers, weavers and tailors reach the height of five feet seven inches.

Toads Aid Horticulturists.

In Europe toads are carried to the cities to market and are purchased by the horticulturists who by their aid are enabled to keep in check the multiplication of the insects that prey upon their fruits, flowers, etc.

Stomach Out Of Order? Try NR

Nothing Better to Straighten You Out After Eating Too Much. Tones Liver, Regulates Bowels. Acts Pleasantly. Guaranteed.

Many people eat too much every day and most eat much too much some days. That is why Americans suffer more than any people in the world from indigestion, biliousness and constipation.

With a little thoughtfulness and care, however, a great amount of this distress could be avoided and you'll never realize how true this is until you become one of the several million people of this country who keep a box of Nature's Remedy (NR Tablets) constantly on hand and use it whenever indigestion, biliousness or constipation threatens.

Unlike laxative purges, cathartics, such as oil, calomel, etc., which merely force bowel action, Nature's Remedy exerts a beneficial influence upon the entire digestive and eliminative system—the stomach, liver, bowels and even the kidneys. Its purpose is to promote vigorous and harmonious action of all the organs that handle the food and body waste.

That is why the results which follow the use of Nature's Remedy are always a delightful surprise to those who first try it. The action while prompt and thorough, is as mild and gentle and pleasant as Nature herself, and the thorough cleansing the body receives brings a feeling of real relief and benefit such as no laxative pill or cathartic ever produced for anyone.

Get a 25c box of Nature's Remedy (NR Tablets) and try it. There is no risk in doing so, for it must give you greater relief and benefit than any liver or bowel medicine you ever used or money back instantly. It is sold, guaranteed and recommended by your druggist.
